

SUSPENDED PARTITION AND FOLDABLE WALLS

# TKS ALL-GLASS MOVABLE WALL

Movable wall panels consist of glass with top and bottom aluminium profiles attached to it  
The stand-alone glass panels move along a rail attached to the ceiling and may be stored in parking areas with different solutions and shapes to open the wall  
The support rollers are in the corners of the top edge of the panel  
The first panel of the movable wall, nearest to the parking area, is always fixed into the floor and may be used as a service door for the parking area

Width\*\*

**Unlimited**

Height\*
